

Attendees at Chengdu Definitions
in Biomaterials Conference 2019 vii
Acknowledgments ix

I. Introduction

- A. Background 1
- B. Logistics of the Consensus Conference 4
- C. Structure of Definitions 6
- D. Introductory General Definitions 6
- E. Terms to be Discussed 8
- F. Structure of the Proceedings 8
- G. Introductory Comments at the Conference 10

II. Biomaterials and biomedical
materials

- A. Biomaterial 15
- B. Biomedical Material 23

III. Biomaterial types

- A. Bioceramic 26
- B. Biopolymer 28
- C. Hydrogel 33
- D. BioHybrid Material 37
- E. Responsive Biomaterial (considered along
with smart material and intelligent
material) 40
- F. Tissue Inducing Biomaterial 44
- G. Other Biomaterials Types: No Voting,
With or Without Discussion 52

IV. Biocompatibility and immune
responses to biomaterials

- A. Biocompatibility 55
- B. Inflammation 56
- C. Adaptive Acquired Immune System 69

- D. Hypersensitivity 7
- E. Myofibroblast 74
- F. Mechanotransduction 76
- G. Blood Compatibility 81
- H. Thrombogenicity 90
- I. Complement Activation 92
- J. Macrophage Phenotype 93
- K. Other Biocompatibility-Related Terms:
No Voting, With or Without Discussion 97

V. Biodegradation phenomena

- A. Biodegradation 103
- B. Biodegradable Polymer 108
- C. Biodegradable Metal 109

VI. Regenerative medicine

- A. Regeneration 115
- B. Regenerative Medicine 121
- C. Tissue Engineering 123
- D. Regenerative Engineering 128
- E. Decellularization 140
- F. Recellularization 142
- G. Whole Organ Engineering 143
- H. Scaffold 145
- I. Template 148
- J. Immunoisolation 151
- K. Other Regenerative Medicine-Related
Terms: No Voting, With or Without
Discussion 152

VII. Biomaterial-based devices

- A. Implant 155
- B. Percutaneous and Transcutaneous 162
- C. Prosthesis 163
- D. Bioprosthesis 168
- E. Stenosis 171
- F. Stent 176

- G. Implant-Related Infection 179
- H. Other Biomaterials-Based Devices Terms: No Voting, With or Without Discussion 185

VIII. Biomaterial-based delivery systems

- A. Drug Delivery 187
- B. Controlled Release 189
- C. Pulsatile Delivery 192
- D. Zero-Order Release 196
- E. Intracellular Delivery 198
- F. Therapeutic Agent 204
- G. Programmable Delivery, Sustained Delivery, Immediate Delivery 206
- H. Other Biomaterials-Based Delivery Terms: No Voting, With or Without Discussion 210

IX. Biomaterial-based biotechnology

- A. Biochip 213
- B. Organ-on-a-chip 217
- C. Microphysiological System 219
- D. Organoid 222
- E. Biomaterials Genome/Biomaterialomics 226
- F. Bio-click Reactions 233
- G. Bioink 236
- H. Other Biomaterials-Based Biotechnology Terms: No Voting, With or Without Discussion 242
- I. Nanoscale and Nanotechnology 244

X. Commentary and summary

- A. Generic Issues 249
- B. Terms With Definitions That Achieved Consensus and Which Supported or Slightly Modified Existing Definitions 252
- C. Terms With Definitions That Achieved Consensus and Which Significantly Modified Existing Definitions 253
- D. Terms With Definitions That Achieved Consensus and Which Underpin Emerging Technologies 253
- E. Terms With Definitions That Achieved Provisional Consensus and Which Underpin Emerging Technologies 254
- F. Other Terms With Definitions That Achieved Consensus or Provisional Consensus Which Place Conventional Terms Into the Context of Biomaterials Science 255

Annex A: Provisional list of terms to be discussed and examples of possible definitions 257

Annex B: The Chengdu Declaration 269
